Our Market

Who we are

Total Flexibility

The environment should adapt to people's needs. People with reduced mobility are all too well aware of this simple truth. Starting with these considerations, we design and manufacture products pursuing a fundamental belief:

It is the environment that has to adapt to people and not the other way around.

Beauty Matters

Whether we are in front of healthcare facilities, hotels or private residences, beauty shouldn't be considered a minor factor only because we are dealing with functional needs.

We believe that beauty matters and helps people to be serene. That's why our products are designed to mix smooth functionality with spotless elegance.

All of our products are DESIGNED & MADE IN ITALY.

Our Innovation

Flexibility

Height/sideways adjustable accessories for a superior comfort and safety.

Versatility

Accessories easy to add and to remove for multi-purpose environment.

Fully Customisable Design

Endless customisation possibilities for adapting the system to any possible style.

Benefits for
Healthcare facilities

**Healthcare is
Changing.
For Good.**

SENZA LIMITI

ProfiloSmart

Profilo Smart for Healthcare

Equipping Profilo Smart in a healthcare facility means bringing value on 3 areas:

DESIGN

BENEFITS FOR THE FACILITY MANAGER

How to differentiate from the competition, significantly improving the offer and the design of a healthcare facility

DESIGN RELATED BENEFITS

A versatile and highly customizable design will have a positive impact on the patient's morale, but also on the perception of the facility's positioning.

BENEFITS FOR THE PATIENTS

The FLEXIBILITY of the Profilo Smart system, has been designed to offer a superior standard on the comfort and safety in the bathroom.

Benefits for the facility manager

DIFFERENT, BETTER

MAIN BENEFITS:

- Raise the bar for the standard for comfort and safety
- Steer the industry towards innovation
- Attract customer with a state of the art solution

- Offer more comfort and safety for patients
- Promote patient's independency
- Increase patient's satisfaction
- Save carers' time

- Guarantee a high standard design. In every room
- Meet accessible requirements
- Versatile environments

Benefits for the facility manager

DIFFERENT, BETTER

Flexibility is something deeply embedded in our philosophy.

We made our products flexible to help the users to enhance their independence. But we also apply the concept of flexibility into the design side, so to offer the chance to adapt the system to every possible bathroom style.

Thanks to these core beliefs, we are able to offer healthcare facilities management **the possibility to differentiate their facilities from the competitions, significantly improving their offer and their design.**

Benefits for the facility manager

VERSATILE ENVIRONMENTS

Flexible environments are resourceful. There is no need to fully equip each bathroom, what you need is having the Profilo Smart's horizontal track and then you can bring the accessories when they are needed. In this way, you won't have to move patient's depending on their changing needs, but only the related accessories.

This is what makes an environment versatile, the possibility to easily fit special equipment according to specific needs.

Benefits for the facility manager

HELPING THE CARERS

Profilo Smart's flexible system, has been designed to enhance the quality of life of the patient and to improve the quality of the carer's work.

No tools, nor keys of any sort are necessary when it comes to make adjustments. Easy and intuitive, our products are extremely helpful during the day-to-day operations carried out by carers.

Enhancing users' independency also means something else:

SAVE CAREGIVERS' TIME!

Design Related Benefits

FOOD FOR ARCHITECT'S THOUGHTS

With Profilo Smart's design you can offer unique possibilities:

- **Flexibility.** Adjusting the bathroom aids to the perfect height, allow you to offer to the user a superior standard for comfort and safety.
- **Versatility.** The possibility to side-adjust and remove the accessories gives you the possibility to move the aids where most needed and to change the status of a bathroom from standard to accessible (and vice-versa) within seconds.
- **Customization.** Our system has been designed to be integrated in any possible environment. Our smart design offer endless customization possibilities.

Design Related Benefits

FOOD FOR ARCHITECT'S THOUGHTS

A Profilo Smart offers endless customization possibilities. You can choose between our plain cover and our cover for insert, which means that you can match the system with any environment. Plastic components of our products come in 5 standard colours, while the aluminium comes in 2 finish, anodized and stainless steel finish.

Plastic components

- Black
- white
- Red
- Blue
- Grey

Aluminium finish

- ANODIZED
- STAINLESS STEEL FINISH

Design Related Benefits

CONTINUITY

Only rarely the design of an accessible bathroom of a private clinic or nursing home is coherent with the overall design standard of the rest of the facility. Even when the lobby or the rooms appear warm and finely designed, bathrooms often look cold and maintain a “medical” feeling.

With the Profilo Smart system it is possible to equip a bathroom with a superior functionality and also an elegant design.

It is possible to be coherent with the design of the facility and create continuity with the warmth of the patient’s home bathroom.

Benefits for the patient

A SUPERIOR ATTENTION TO PATIENTS

They say there aren't two patients with exactly the same needs.
We believe they are right.

DIFFERENT/CHANGING MOBILE CAPABILITIES

DIFFERENT BODY CHARACTERISTICS

THOUSANDS OF
DIFFERENT
NEEDS,
ESPECIALLY IN
THE BATHROOM

PROFILO SMART'S FLEXIBLE
SYSTEM REPRESENTS THE
PERFECT SOLUTION FOR
ADDRESSING THE NEEDS
OF ANYONE, REGARDLESS
OF MOBILE CAPABILITIES
AND BODY
CHARACTERISTICS.

Benefits for the patient

A SUPERIOR ATTENTION TO PATIENTS

The possibility to height or sideway adjust our range of bathroom aids will make sure they will adapt exactly to the needs of each user.

Flexibility represents a perfect solution also if you need to address the changing needs of an aging person who lives in his own house.

Flexibility enhances the user's independence, which is key for boosting morale.

Product Features

Key Features

Hi-quality materials

- Aluminium 6060 T6 / 6063 T6
- Anodization 10 / 15 micron
- Diecasting aluminium
- Inox stainless steel 304
- Antibacterial soft material
- Plastic surface anti-bacterial treatments (soft touch varnishing)
- Plastic material (ABS, PA6 30% GF, POM)

An Unparalleled Hygienic Standard

At Profilo Smart we know how hard medical professionals work to ensure equipment safety and a clean environment, that is why we take this issue very seriously.

Profilo Smart decided to stand in the front line of prevention and has adopted innovative, cutting-edge solutions to prevent bacterial contamination.

Healthcare-associated infections (HAIs)

Diseases patients can contract while receiving medical treatment in a healthcare facility – are a major, yet often preventable, threat to patient safety.

These specific type of cross-infections are determined by the transfer of harmful microorganisms. Bacteria and viruses are among the most common cause of HAIs and the spread of these infections can occur between people, pieces of equipment, or within the body. Healthcare-associated infections can cause many unexpected and dangerous complications.

An Unparalleled Hygienic Standard

Anti-bacterial plastic varnishing.

All the plastic components of our products are treated with an innovative varnishing that secure a superior hygienic standard, ensuring the material is anti-bacterial.

Anti-bacterial sitting cushion and backrest.

Our shower seats are equipped with XL EXTRALIGHT® material. Soft, comfortable, flexible and anti-slip it also ensures the highest standard of hygiene thanks to its anti-bacterial properties.

Easy to clean

All of our products has been designed using only neat surfaces that make them very smooth and easy to clean. This is a fundamental pre-requisite for a superior hygienic standard.

Flexibility Type

A flexible environment is a smart one:

it is versatile and can be adapted depending on the different needs of the users. Addressing the user's needs means being able to create a system that balances the reduced mobility thanks to the ability to move its accessories in different directions.

Height & Sideways Adjustable

These types of products are designed to be attached on the horizontal track but they come also with a vertical track, allowing them to be adjusted both horizontally and vertically.

Height Adjustable

This range of products comes with a wall mounted vertical track that allows users or caregivers to adjust it vertically.

Fixed

We completed our product range with a series of foldable fixed on the wall items with a superior design.

Removable

The wide range of items designed for the horizontal track, can be easily removed when not in use. This feature brings a great versatility to the environment allowing the bathroom to completely adapt to the arise of different needs.

Sideways Adjustable

Many of our products are designed to be moved horizontally along the track facilitating a versatile environment.

Select the Right Flexibility Type

Height & Sideways Adjustable

- It guarantees the maximum level of flexibility and it is indicated for rooms with multiple users.
- It helps addressing several needs of several different people, that is why is highly indicated for **HOSPITALS**.
- The height & Sideways adj. products can be removed from the track within seconds, this feature makes the flexibility the perfect match for **HOTELS**.

Height Adjustable

- Elevated flexibility level.
- Indicated when it comes to address similar needs in different people (stable conditions).
- Indicated also for single users with changing needs.
- Specially indicated for **HOSPITALS**.

Fixed

- Indicated for single users with stable conditions.
- Recommended for public areas as a anti-theft and vandal-proof solution.
